UI/UX Designer with 3+ years of experience leading User-Centered Design, UX research, and end-to-end product design for web, mobile, and enterprise systems. Skilled in UX strategy, rapid prototyping, responsive design, usability testing, and cross-functional collaboration. Led a 0-to-1 digital transformation serving 9,200+ users with a 52% digital adoption rate.

Education

National Taiwan University of Science and Technology (NTUST)

Taipei, Taiwan

Master of Design, Department of Design

Feb 2024 – Feb 2026

- Overall GPA: 4.11/4.30
- Thesis: Applying AI-Assisted Service Design to the Digital Transformation of Religious Services: A Case Study of a Taoist Temple 🔗

Taipei National University of the Arts (TNUA)

Taipei, Taiwan

Bachelor of Fine Arts in Animation

Sep 2016 – Jul 2020

- Overall GPA: 4.00/4.30

Work Experience

UX Researcher & Lab Manager

Taipei, Taiwan

Design Innovation and Thinking Lab, NTUST

Feb 2024 – Jun 2026

- Independently led a 0-to-1 digital transformation for a mid-sized traditional temple as the team's sole designer and product lead (with one engineer), from stakeholder research and requirements definition through information architecture and system design to production launch, replacing a legacy back-office tool that stakeholders had largely abandoned, now serving 9,200+ users (see Featured Project).
- Directed research operations across 4 concurrent projects, conducting stakeholder interviews and pain-point analysis, and coordinated closely with faculty and 10+ lab members to align schedules and priorities.

UI/UX Designer

New Taipei, Taiwan

Steps Software Inc.

May 2022 – Dec 2023

- Redesigned the UX/UI of the company's customizable multi-feature app and its admin backend system, both of which shipped with full functionality but inconsistent design patterns and poor usability; unified the interaction logic across both products, simplified user flows, and personally built select front-end screens; both internal teams and clients reported the redesigned system was significantly easier to understand and operate.
- Designed and delivered a web design template product line (3 templates), the company's first productized web design offering, owning content strategy, visual design, and templating for school-sector clients; the new product line helped the company win 3+ new contracts.
- Delivered UI/UX design across 10+ projects spanning client-facing websites, front/back-end management systems, and mobile apps.
- Independently owned a university venue-booking website end-to-end, from design through front-end build; learned HTML/CSS and Bootstrap on the job to deliver a fully accessible site directly to the client.

Graphic Designer

Taipei, Taiwan

Chuan Hwa International Education Co., Ltd.

Aug 2020 – May 2021

Dianjing Image Multimedia Co., Ltd.

Jun 2021 – Jan 2022

- Designed illustrations, motion graphics, and campaign visuals for exhibitions, public displays, educational programs, and camps, supporting consistent visual communication across audience-facing initiatives.

Featured Project

Temple Service Digital Transformation

Yilan, Taiwan

Product Manager, UI/UX Designer

Feb 2024 – Jun 2026

- Conducted the organization's first systematic service audit through 17 stakeholder interviews and end-to-end journey mapping, informing a redesign that consolidated 18 manual process nodes into 6 (a 66.7% reduction in touchpoints).
- 52.2% digital replacement rate (paper to digital) across 9,200+ users, with 6,100+ online service registrations; cut single-record processing time from 1 week to under 5 minutes; improved user satisfaction by 10% (4.0/5 to 4.4/5).
- Drove NT\$10M+ in accumulated transaction volume through the platform, demonstrating its ability to handle high-value operations at scale.
- Validated the Minimum Viable Architecture (MVA) by launching a new digital module for a major annual event, reversing a three-year revenue decline and driving 69.8% YoY growth.

Chen, S.-Y. & Tang, H.-H. (2025). "Utilizing AI-Assisted Service Design to Address the Digitalization Challenges of Religious Services: A Case Study of Taoist Temple Service." **Presented at IASDR 2025 — Best Paper Award.** 🔗

Skills

- **UX Research & Strategy:** UX Strategy, User & Stakeholder Interviews, Usability Testing, User Scenario Analysis, Journey Mapping, Workflow Analysis, Research Synthesis, Customer Insights
- **Product & UI/UX Design:** Rapid Prototyping, Interaction Design, Information Architecture, Wireframing, Visual Design, UI Design, Design Systems
- **Tools:** Figma, FigJam, HTML, CSS, Bootstrap, React (basic)
- **Collaboration & Delivery:** Requirement Definition, Cross-Functional Coordination, Client Communication, Project Management
- **Languages:** English (TOEIC 735), Mandarin (Native)
